

CubisLITE

Ideal low cost security solution
for single retail stores, homes and country houses.

CubisLITE is a robust digital video recorder solution keeps up with demands of small medium businesses. Controlling up to 16 cameras, it provides extended digital video storage, multiplexing, and remote access at a very competitive price.

CubisLITE is extremely easy to use; cameras are detected instantly on start-up and all storage and transmission options are automatically set correctly for the best performance allowing the user to enjoy easy access to live and archived footage both locally or remotely through any TCP/IP connection.
